DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Merz et al. (4,932,955). With respect to claims 1-14 and 23, Merz et al. disclose, in the figures 1-5, a clip with two clamping arms (103a, 103b) having a clamping region, a common shaft (105), a tension element or helical spring (111) with two free ends (120a, 120b), a counter-bearing (213), operating elements (125a, 125b) in each arm where each arm has a free end, and a transition area (at 122a, 122b); where the bearings are supported on the shaft, where one of the bearings comprises a bearing ring (106a or b) and the other bearing comprises a bearing shell (110 a or b), where the shaft is formed by the tension element, where the free ends of the tension element are respectively angled off and supported by the clamping arms on a side facing away from the clamping region and at tension element abutments (116a, 116b) or recesses. With respect to claims 15-19, Merz et al. disclose, in figures 6 and 7, an embodiment of the clip as claimed, where operating elements or projections (240a, 240b) are disposed on the bearings at regions of the bearing shell and bearing ring and diametrically opposed to the clamping region.

Allowable Subject Matter

3. Claims 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record, alone or in combination, discloses a surgical clip with, inter alia, clamping arms, bearings, a tension element, and operating elements, where the elements comprise tool receptacles which have a spherical surface, a hemispherical recess, or a hemispherical projection.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haskins (1,589,076) and Baucom (4,416,266) teach clips.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian W. Woo whose telephone number is (703) 308-0421. The examiner can normally be reached Mon.-Fri., 7:00 AM to 3:00 PM Eastern Time, alternate Fridays off.
